

DIPLOMA THESIS EVALUATION REPORT

MSc or BSc degree

Main field of study: Computer Science

Specialisation: –

Title of the thesis:

1. Opinion of the supervisor (evaluation of the student in terms of knowledge, skills, diligence and ability to work on his/her own):

SKIP

2. Achievement of the intended learning outcomes in accordance with the Final Project syllabus:

No.	Learning outcome	Explain how the learning outcome has been achieved
1.	Introduce and analyze properly a complex computing problem, based on CS/IT theories.	
2.	Present an overview of the related area, with both theoretical and practical solutions in scope.	
3.	Formulate a solution proposal, decomposed into tasks, specifying a set of requirements to be fulfilled.	
4.	Use knowledge and skills related to the curriculum of studies to solve engineering tasks.	
5.	Present the developed solution in a sufficiently detailed and clear manner.	
6.	Draw proper conclusions, possibly based on an experimental evaluation of the proposed solution.	
7.	Cite properly and accurately relevant scientific and technical literature.	

3. Content-related comments:

4. Potential use of the thesis (suitability for publication, availability for outside institutions, reference source, etc.):

5. Final grade¹:

Łódź,
(date)

.....
(signature of the supervisor / reviewer)

¹ The following grading scale is used at Lodz University of Technology: 5.0 – five, 4.5 – four and a half, 4.0 – four, 3.5 – three and a half, 3.0 – three, 2.0 – two
